FENGCAI

ABOUT US

SEIKO QUALITY
CRAFTSMEN CREATE WISDOM
精工品质 匠心制造

Fengcai Series is a high-end brand of Taizhou Daqiu Sanitary Ware, founded in 2003, the company covers an area of nearly 10,000 square meters, with nearly 100 sets of various processing equipment, complete production lines, strict quality control; The company is focusing on all copper sanitary hardware products design, research and development, manufacturing, sales, service in one of the comprehensive enterprises.

We have been adhering to the "details determine quality, quality achievement Fengcai" spirit of ingenuity, is committed to creating more seiko quality of high-end copper bathroom hardware products, and strive to perfect product quality and details, for consumers to create a comfortable, healthy, environmental protection living space.

For more than 10 years, our products are mainly exported to Japan, Europe and the United States and other overseas high-end markets. With nearly 15 years of experience in supporting production in high-end foreign enterprises, we have accumulated excellent technology and extreme details. In 2016, we established a domestic marketing center. FENGCAI brand officially entered the domestic market, we actively innovate, break the industry pattern, the first research and development of the inner edge of finishing floor drain, subvert the whole traditional market, since entering the market, deeply sought after by the market, become the representative of high standards in the industry.

In less than two years, the network covers thousands of domestic building materials market, the strong rise of the whole industry. Fengcai positioning in the high-end, to the clever art and exquisite craft to carve every product, touching customers for the pursuit of elegant quality of life and yearning. Starting from every detail of the product, the pursuit of perfection, the achievement of the unique Fengcai, has been imitated, has never been surpassed.

We are convinced that every Fengcai people and customers are the promoters of our development. In order to let more consumers enjoy the highest quality of China's fine floor drain, Fengcai people are making unremitting efforts every day.

峰采系列是台州大邱卫浴旗下高端品牌,始创于2003年,公司占地面积近万平方米,拥有各类加工设备近百台,生产线完整,品质管控严格;是一家专注于全铜卫浴五金产品的设计,研发,制造,销售,服务于一体的综合型企业。

我们一直秉承“细节决定品质,品质成就峰采”的匠心精神,致力于打造更具精工品质的高端全铜卫浴五金产品,力求产品质量和细节尽善尽美,为消费者创造舒适健康、环保的生活空间。

十余年来产品以出口日本,欧美等海外高端市场为主。凭借近十五年高端外企配套生产经验所积累的出色工艺和极致的细节要求,2016年成立国内营销中心,FENGCAI品牌正式进入国内市场,我们积极创新,打破行业格局,首创研发出内边缘精加工地漏,颠覆整个传统市场,入市以来,深受市场追捧,成为行业内高标准的代表。在不到两年时间里,网点覆盖国内数以千计的建材市场,强势崛起轰动整个行业。峰采定位中高端,以艺术品的灵动和精湛的工艺来雕琢每一件产品,触动客户对高雅生活品质的追求和向往。从产品的每一处细节着手,追求完美无瑕,成就峰采的与众不同,一直被模仿,从未被超越。

我们确信,每个峰采人和顾客都是我们发展的推动者,为了让更多消费者享受到中国最高品质的精工地漏,峰采人每一天都在为此不懈努力。

FENGCAI 峰采

17 PROCESSES 十七道工序

01 SELECTION 选材

02 CUTTING 切割

03 FORGING 锻造

04 SHAPING 整形

05 CUT EDGE 切边

06 SHOT BLASTING 抛丸

07 TURNING 车削

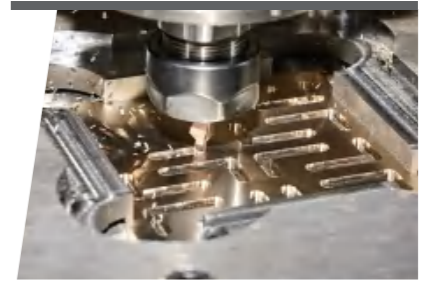

08 MILLING EDGE 铣边

09 INNER WALL CARVING 内壁精雕

10 PATTERN CARVED 花纹精雕

11 POLISHING 砂带抛光

12 POLISHING 风轮精抛

13 PLATING 电镀

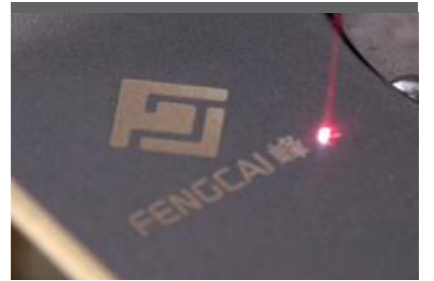

14 TEST 检验

15 SALT SPRAY TEST 盐雾测试

16 MARKING 打标

17 PACKAGE 包装

FOCUS ON 17 PROCESSES
ONLY FOR A SEIKO FLOOR DRAIN
专注17道工序，只为一个精工地漏

WE'VE BEEN FOCUSING ON RESIDENTIAL DRAINAGE HEALTH

一直以来，我们只专注住宅排水健康

HEALTHIER SELECTION OF MATERIALS FOR MORE PEACE OF MIND

Selection of standard Hpb59-1 brass, brass material with self-sterilization function, according to the United States well-known data provided by brand manufacturers, copper material for drain and other residential drainage products, you can use the 80 year, is the ideal material for residential drainage.

健康选材更放心

选用标准Hpb59-1黄铜材质，黄铜材质具有自灭菌功能，据美国知名品牌制造商提供的数据，铜材质的地漏等住宅排水产品，可以使用80年，是住宅排水设备最理想的材料。

ENVIRONMENTALLY FRIENDLY PRODUCTION IS MORE COMFORTABLE

Raw material chemical composition testing (copper content, lead content is excessive), hot forging rough tes (Whether the rough size meets the technical requirements), finished testing (product basic size is up standard), polishing inspection, coating inspection, final inspection

环保生产更舒心

原材料化学成分检测（铜含量、铅含量等是否超标），热锻毛坯检验（毛坯尺寸是否达到技术要求），精加工检测（产品基本尺寸是否达标），抛光检验，镀层检验，终检。

STRONG AND CORROSION-RESISTANT FOR GREATER PEACE OF MIND

630 tons CNC electric screw press (J58K-630) forging hot forging, once Forming, high precision forgings, parts of the material density, physical properties and corrosion resistance get multiplied to improve.

坚固耐腐更安心

采用630吨数控电动螺旋压力机(J58K-630)进行毛坯热锻、一次成型,使锻件精度高,零件的材质密度、物理性能和耐腐蚀性能得到成倍提高。

THE CHOICE OF A BATHROOM THE CHOICE OF A HOUSE THE CHOICE OF THOUSANDS OF FAMILIES

一间浴室的选择，一套房子的选择，千万家庭的选择

Fengcai Floor Drain inherits the craftsman spirit. After 15 years of development, Fengcai innovates the old, optimizes the product details, does not imitate, does not copy, keeps improving, the ingenuity Fengcai, from the main body of the product to the inner core of the product all independent research and development.

峰采地漏传承工匠精神，历经十五年发展历程，推陈出新，优化产品细节，不模仿，不抄袭，精益求精，匠心峰采，从产品主体到产品内芯全部自主研发智造。

KEEP IMPROVING FOCUS ON DRAINAGE HEALTH

精益求精，专注排水健康

Aviation grade ABS material, mechanical gravity drainage, the use of reverse gravity balance principle, to solve the water seal drain easy plugging slow drainage, spring magnetic suction drain time easy failure and other technical problems. Filter and core integrated design, easy to clean, easy to install, large displacement, faster drainage, the displacement of up to 40 liters/min.

采用航空级ABS材料，机械重力排水，利用反向重力平衡原理，解决了水封地漏易堵排水慢，弹簧磁吸地漏时长易失效等技术难题。过滤网与芯子一体设计，清理方便，装取简易，大排量，排水更快，排量达到40升/每分钟。

Large displacement
大排量

anti odor
防返臭

anti back water
防返水

anti pest
防虫害

Easy to clean
易清理

40L/min

Accurate gravity calculation
Aviation class ABS inner core
Ingenious structural design
More water flow out
Farewell magnetic absorption demagnetizing, bouncing core blocking trouble
Silicone technology, better sealing

重力精确计算
航空级ABS内芯
结构巧妙设计
出水流量更大
告别磁吸消磁，弹跳芯堵塞烦恼
硅胶工艺，密封性更佳

TECHNOLOGY 工艺

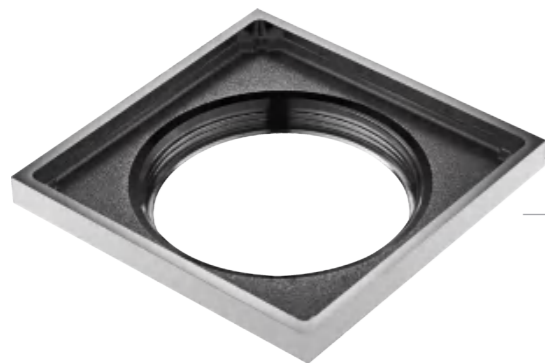

Stain steel hook
小拉钩

Brass panel, Obtuse engraving,
quadrangular fllet design
黄铜面板，钝角精雕，四面圆倒角设计

Unique pressing sealing structure, so that the
deodorant core and the floor drain ring closely
combined, deodorant more thoroughly.
独特按压式密封结构，使除臭芯与地漏圈紧密结合，除臭更彻底

Fine copper forging integrated forming thickening
body, CNC precision intelligent manufacturing
精铜锻造一体成型加厚主体，CNC精密智造

THE OUTSIDE IS GOOD AT THE TYPE AND THE INSIDE IS GOOD AT THE CORE

外秀于型 内精于芯

MAIN BODY 主体

Selected standard Hpb59-1 high quality brass material, forging and forming, using the world's most advanced CNC automatic machining center re ned.

精选标准Hpb59-1优质黄铜，锻造一体成型，采用全球最先进的CNC全自动加工中心精制而成

PANELS 面板

Selected standard Hpb59-1 high quality brass material, thickened design, 70 years of use without collapse, real material, ne carving and grinding, the inner edge of the ne processing, so that the panel and the main body tightly stitched, tetrahedron fllet design, make the product more rounded take without cutting hands, hollow out 50% design, rapid drainage and can effectively lter hair and other debris.

精选标准Hpb59-1优质黄铜，加厚设计，使用70年不塌陷，真材实料，精雕打磨，内边缘精加工，使面板与主体严丝合缝，四面圆倒角设计，使产品更加圆润取拿不割手，镂空比例50%设计，排水迅速且能有效过滤毛发等杂物

FLOOR DRAIN CORE 地漏芯

Aviation grade ABS material, mechanical gravity drainage, the use of reverse gravity balance principle, to solve the water seal drain easy plugging slow drainage, spring magnetic suction drain time easy failure and other technical problems. Filter and core integrated design, easy to clean, easy to install, unique patent 90° direct drainage design, deodorant core is made of imported silicone, when drainage deodorant silicone device automatically opened, with the size of the water can automatically adjust the opening and closing Angle, large displacement, faster drainage, displacement up to 40 liters/minute.

采用航空级ABS材料，机械重力排水，利用反向重力平衡原理，解决了水封地漏易堵排水慢，弹簧磁吸地漏时长易失效等技术难题。过滤网与芯子一体设计，清理方便，装取简易，独创专利90°直排水设计，除臭芯采用进口硅胶制作，排水时除臭硅胶装置自动打开，随水流大小可自动调节开合角度，大排量，排水更快，排水量达到40升/每分钟

STAIN STEEL HOOK 小拉钩

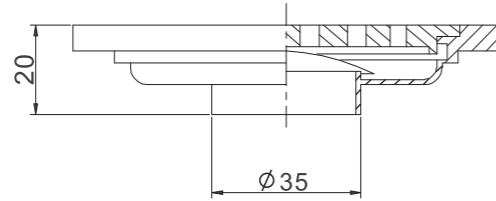

In view of the precision of the product, it is not convenient to clean the panel by hand. Each product is equipped with a small hook to pull the panel, which is convenient to clean the floor drain.

鉴于产品的精密度，手取面板清理不方便，每个产品配置小拉钩提拉面板，方便地漏清理。

PERFORMANCE COMPARISON OF FLOOR DRAIN CORE

地漏芯子性能对比

National building materials industry building hardware plumbing product quality supervision and inspection testing center testing
国家建筑材料工业建筑五金水暖产品质量监督检验测试中心检测

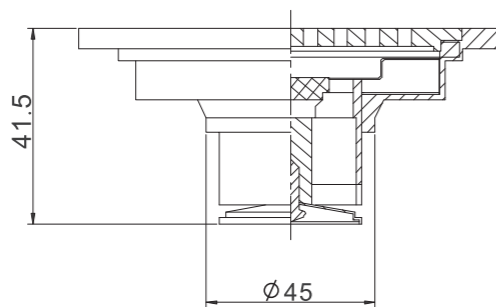

BELL JAR TYPE FLOW RATE 6.7L/MIN

钟罩式流量6.7L/min

The water seal principle is used to prevent odor, but the structure of the water seal is very shallow, easy to dry up or pipe siphon effect, the water sucked up. The cover plate is easy to fall off and shift, and it is difficult to achieve anti-odor effect. The product displacement is very small, not suitable for bath room, washing machine drainage use.

利用水封原理隔臭，但该结构水封很浅，容易干涸或管道产生虹吸作用，把存水吸干。盖板极易脱落移位，很难达到防臭效果。该产品排水量很小，不适合沐浴房、洗衣机排水使用。

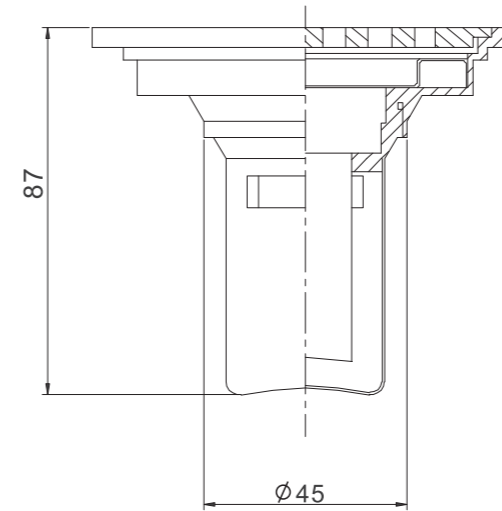

CLAMSHELL TYPE FLOW RATE 14.5L/MIN

翻盖芯式流量14.5L/min

The gravity clamshell principle is used to prevent odor, water pressure is used to open the side sealing cover when drainage, and the sealing cover falls back from gravity when there is no water. The product uses a hard sealing structure, has a certain sealing effect, but the displacement is small, not suitable for bath room, washing machine drainage use.

利用重力翻盖原理防臭，排水时利用水压打开侧密封盖，无水时密封盖自重力回落密封。该产品采用硬密封结构，有一定密封效果，但排水量较小，不适合沐浴房、洗衣机排水使用。

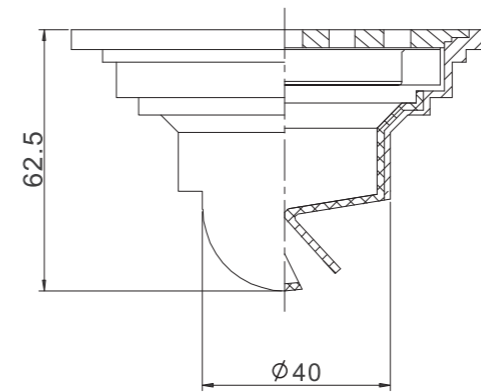

DEEP WATER FLOW RATE 9L/MIN

深水式流量9L/min

Using the principle of water seal to prevent odor, the product has good anti-odor effect. Long sealing core structure, high requirements for installation height, poor self-cleaning ability, easy to cause blockage, small displacement, not suitable for bath room, washing machine drainage and long-term no water use.

利用水封原理防臭，该产品防臭效果优良。密封芯子结构较长，对安装高度要求高，自清洁能力差，容易造成堵塞，排水量较小，不适合沐浴房、洗衣机排水及长期无水流场所使用。

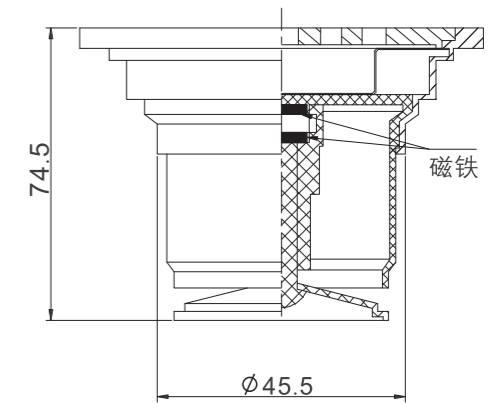

SPRING CORE FLOW RATE 14.2L/MIN

弹簧芯子流量14.2L/min

The spring elasticity principle is used to prevent odor, and the water pressure is used to open the bottom sealing cover when the water is drained. It is in a sealed state when the water is not drained. The product uses hard sealing structure, has a certain sealing effect, but the displacement is small, not suitable for bath room, washing machine drainage use.

利用弹簧弹力原理隔臭，排水时利用水压打开底部密封盖，不排水时处于密封状态。该产品采用硬密封结构，有一定的密封效果，但排水量较小，不适合沐浴房、洗衣机排水使用。

MAGNETIC SUCTION FLOW RATE 25L/MIN

磁吸力芯子流量25L/min

The principle of mechanical suction is used to prevent odor. When drainage, water pressure is used to open the bottom sealing cover. When no drainage, it is in a sealed state. The product uses hard sealing structure, has a certain sealing effect, and reaches a certain displacement, but is not suitable for large displacement rest bath room, drum washing machine drainage use.

利用机械吸力原理隔臭，排水时利用水压打开底部密封盖，不排水时处于密封状态。该产品采用硬密封结构，有一定的密封效果，并且达到一定的排水量，但不适合大排量沐浴房、滚筒洗衣机排水使用。

The pursuit of top quality and visual experience, simple and full lines, beautiful and detailed outlines, simple classics in life are all imprinted with the traces of peak selection. From one story to another, you can touch the eternal classic.

Experience with your heart, that kind of beautiful classic and distinguished...

追求顶尖品质和视觉感受，简单而丰满的线条，优美而细致的轮廓，生活中的淳朴经典都烙下峰采的痕迹。

从一个故事到另一个故事，可以触摸到永恒经典。用心体会，那种唯美经典和尊贵不凡.....

CUSTOM SERIES

定制系列

Customization is popular in high-end hotel clubs and high-end villas. The large size is not easy to accumulate water, but also has a domineering style that cannot be matched by conventional floor drains. It gives more imagination to the home improvement space and reflects your exquisite lifestyle.

定制流行于高级酒店会所和高档墅区寓所，大尺寸不仅不易积水，而且有着常规地漏无法企及的霸气，赋予家装空间更多想象，体现您精致的生活品味

ANGLE VALVE CHARACTERISTICS

1. EXPLOSION-PROOF DESIGN:

the use of high-quality 59 brass, valve body forging integrated forming, high hardness, folding and torsion resistance, no rust, no rust water, the structure is tight and thick, thickness > 1.8mm, with super pressure explosion-proof performance, forging technology to exclude the production of traditional sand casting may produce the hidden danger of air holes and water leakage.

2. FINE DRILLING PROCESS:

valve handle trident design, feel comfortable and light, switch mode all use slow-open structure, overseas design, export quality, using high quality 59 brass stem, after special process Japan imported gasket, can withstand 90 °C high temperature, low temperature does not embrittlement, wear resistance, corrosion resistance, durable, not foaming, strong sealing, economic water saving, service life of up to 500,000 times or more. Slow-opening switch mode compared to fast-opening structure, saving water, to avoid the traditional ceramic spool because of climate temperature changes, resulting in ceramic spool bite wear caused by leakage potential problems.

3. PLATING GRADE:

ten layers of plating, sufficient thickness, uniform and smooth, elegant and beautiful color 4. lead standard: in line with the national GBT1176 lead standard, no harm to human health, to ensure that you and your family use products without harmful metal elements, a protection of the user's health.

ACCESSORIES SERIES

配件系列

Every detail flashes a devotion to art, and every square inch reveals magnificent magnificence. Let art lead and play the worship of life.

每一细节，都闪烁出对艺术的虔诚，每一方寸，都流露出华丽的宏伟，让艺术领衔，奏响对生活的膜拜

角阀特性:

1. 防爆设计: 选用优质59黄铜, 阀体锻造一体成形, 硬度高, 抗折抗扭力强, 不生锈, 不产生锈水, 结构严密厚实, 厚度>1.8mm, 具有超强的抗压防爆性能, 锻造技术排除了传统砂铸的生产可能产生的气孔而漏水的隐患。

2. 精钻工艺: 阀柄三叉设计, 手感舒适轻快, 开关方式全部采用慢开结构, 海外设计, 出口品质, 采用优质59黄铜阀杆, 经过特殊工艺处理日本进口密封垫, 可承受90°C的高温, 低温不脆化, 耐磨损, 抗腐蚀, 经久耐用, 不发泡, 密封性强, 经济节水, 使用寿命高达50万次以上。慢开开关方式相比快开结构, 节约用水, 避免传统陶瓷阀芯因为气候温差变化, 导致陶瓷阀芯咬合磨损造成漏水隐患。

3. 电镀等级: 十层电镀, 足够厚度, 均匀光滑, 色泽优雅美观

4. 含铅标准: 符合国家GBT1176含铅标准, 对人体健康无伤害, 保证您和家人使用无有害金属元素的产品, 呵护用户身体健康。
